

THE NEW GENERATION OF **COOLING**

GAGGENAU

THE BEST WAY TO STAND OUT IS TO FIT IN

With a handleless option, the doors of the new generation of cooling ensure seamless integration into any kitchen design. Created to make the impression of a piece of furniture, let this meticulously crafted appliance transform your living space into a visual masterpiece.

BRILLIANCE. UPSTAGED

As the doors open, the light softly illuminates your culinary collection, courtesy of the warm-white and glare-free LED lights. The light slowly dims up and adjusts based on ambient illumination to showcase your finest food in the most captivating way inside all cooling and freezing compartments.

MATERIALITY MATTERS

Inside, the dark brushed stainless steel turns surfaces into statements and pairs exquisitely with solid anthracite aluminium elements. From the flat inner doors to the door bins, from the adjustable aluminium-framed glass shelves to the drawers, everything in the new generation of cooling emphasises our mantra: materiality is paramount.

A TOUCH OF EXTRAORDINARY

The new generation of cooling effortlessly elevates your experience. The adaptive light concept highlights and dims compartments and drawers based on your actions. Furthermore, the display guides you with animations through appliance maintenance and allows you to select dedicated cooling programmes for specific food categories. With Home Connect, control your cooling appliance remotely from any mobile device.

CHILLS

The new generation of cooling houses a state-of-the-art, professional freshness system comprising a chilled drawer and up to two fresh climate drawers that complement the spacious cooling compartment. Dedicated programmes with bespoke humidity and temperature control via an intuitive touch display ensure your ingredients retain their essence.

The icing on the cake is a spacious freezer compartment with an ice maker, and freezing technology to protect your culinary treasures from freezer burn as well as oxidation.
